

SHORT CV: Aykan Akçay

Thematic Area: 3

Key areas of Expertise in Digital Heritage:

- Digital Epigraphy & Archaeology
- Visualisation
- Reflectance Transformation Imaging (RTI)
- Photogrammetry (SfM)
- 3D Printing

A. Akçay is working as a Ph.D. researcher at the Mediterranean Civilisations Research Institute at Akdeniz University, Antalya/Turkey.

In his master thesis, he re-evaluated the ancient Greek and Roman inscriptions found in the ancient city of Phaselis by applying Reflectance Transformation Imaging method.

He is currently working on his doctorate thesis, which is investigating the contributions of innovative digital visualization methods within the context of epigraphical and archaeological materials. He has been working in Phaselis Research and Excavation project and responsible for the digital documentation and analysis of the artefacts since 2012.
