

SHORT CV: Betül Gürel

Thematic Area: 3

Key areas of Expertise in Digital Heritage:

- Digital Archaeology
- Ancient History
- Necropolis Studies, Death and Burial Customs
- Visualisation
- Reflectance Transformation Imaging (RTI)

B. Gürel is working as a Ph.D. researcher at the Mediterranean Civilisations Research Institute at Akdeniz University in Antalya/Turkey. She has finished her master thesis on the documentation, typology and archiving of north-east and western necropolis of Phaselis.

Gürel's doctoral studies mainly focused on the burial customs and typology of the south-eastern necropolis of Phaselis and tombs located in the territorium of the ancient city.

She has been working in Phaselis Research and Excavation project and responsible for the digital documentation and analysis of the artefacts since 2012.

She is currently preparing her PhD thesis, which is investigating the contributions of digital imaging methods within the scope of archaeological context.
