

SHORT CV: Oriol Vicente Campos

Thematic Area: TA5- DEMAND

Key areas of Expertise in Digital Heritage:

Digital Social Innovation
Open Science in Humanities
Citizen Science

Archaeologist, specialist in the applications of ICT in the field record and visualization of heritage sites.

Actually I'm working as the coordinator of the Network on Cultural Heritage in the Autonomous University of Barcelona and of the Network of Digital Humanities and Digital Heritage. My mission in the university is to implement the 4 helix model in the university in the field of Cultural Heritage, especially towards the inclusion of the ICT in the Humanities, but taking in account the relationship between the research and the community.

In that sense we are implementing a set of open laboratories focused on Digital Social Innovation inside the university, applying Living Lab and Fab Labs methodologies. One of the goals is to redefine the Library of the future, that's why one of those Labs is oriented to the Digital Humanities inside the Humanities Library of the University.

I'm father, wikipedian and I like sailing....

ViMM has received funding from the European Union's Horizon 2020 Programme as Coordination and Support Action, under GA n° 727107
