

SHORT CV Ez Yuan

Thematic Area: 2

Key areas of Expertise in Digital Heritage:

- Principal Content Engineer HiverLab, Singapore

Ez Yuan Principal Content Engineer at the Hiverlab.

Hiverlab is a pioneering infocomm media technology innovation and content production company based in Singapore, currently focusing on immersive technology and media (Virtual Reality or VR / Augmented Reality or AR / Mixed Reality or MR). Their creative content, applications, and proprietary system or platform named Storyhive have been widely used for training, education, corporate communication, marketing campaigns, public events, virtual tourism regionally and globally, establishing long-term strategic partnerships with important industry players such as Samsung, Huawei, AliCloud, NVIDIA, Autodesk, Seagate, etc. They strive to advance storytelling and communication experiences with media technology, to create social impact and enhance human cognitive capabilities.

Hiverlab produces high-quality customized immersive content for the clients, producing both interactive VR experiences (based on videos or CG) and 360° video storytelling experiences. To enable great VR experience, Hiverlab continually innovates by adopting and developing new hardware devices. They design and manufacture their proprietary VR hardware solutions such as aerial, underwater, and remote controlled moving 360° filming solutions.

ViMM has received funding from the European Union's Horizon 2020 Programme as Coordination and Support Action, under GA n° 727107
