

## SHORT CV Richard Light

Thematic Area: 3

### Key areas of Expertise in Digital Heritage:

- Data standards, including SPECTRUM and CIDOC CRM
- Linked Data for cultural heritage
- Markup standards (XML; TEI)

Richard Light is a freelance museum information systems expert, with over 40 years' experience of developing and implementing standards for museum information systems.

He has worked with the UK Collections Trust on the publication of the SPECTRUM framework and is a long-standing member of CIDOC (the ICOM International Committee for Documentation). He is also working with the Linked Pasts Working Group of the Pelagios project on a framework for describing places and people in a distributed Linked Data environment.

ViMM has received funding from the European Union's Horizon 2020 Programme as Coordination and Support Action, under GA n° 727107
